

Final conference in Brussels

Job placement teacher and trainers

*Wednesday 6 September 2017, 9.00 – 13.00
Delegation of the Basque Country to the EU
27, rue des Deux Eglises*

The Multiplier Event is the closing event of the JOPAPP project partly funded by the European Commission.

Recent European studies and partners experience have shown a shortage of soft skills among the students entering the labour market. The current labour market needs require new approaches and methods to get the necessary qualified work force. The aim of the project is to reinforce these skills through the direct application of the innovation model and tool, JOPAPP (job placements app), in the implementation of the module called "job placement", in which students spend a training period working in a company abroad.
