The European learning platform for teachers is kicking off. Via the project DISCO (Digital second chance opportunities) a European wide online platform for second chance education is built, that will act as knowledge and quality centre. The centre will upgrade national developments to a European, transversal, setting: further education of teachers, qualitative benchmarking of schools, tools for working with beneficiaries and validation of international placements are at the heart of the centre. The developed tools create the opportunity to think and act borderless in European second chance education.
