

Newsletter 3 || Spring 2014

### News: offline becomes online!

The project partners of the C-TEST project met in Visegrád, Hungary in March, hosted by the nearby Váci mező VET school. Canice Hamill of Canice Consulting organised a working session and showed the partners the e-learning environment.

All 8 courses on renewable energy and related topics are supported by videos, quizzes and practical exercises. They are fully ready by now in 5 languages. They will become available as an integrated e-learning course for testing in practice by VET schools across Europe this Spring. Below an impression of the online learning platform.

### Project results

The main final result of the C-TEST project is a full online course covering 8 topics: Solar Energy, Wind Energy, Water Energy, Biomass, Geothermal Energy, Waste Management & Recycling, Energy Efficiency, and Environmental Awareness. All materials will be available in English, Dutch, Slovakian, Hungarian and Swedish. The course will be accessible for free after registration.
