

Online course on Renewable Energy fully ready, Training Day Manual available!

The C-TEST project is coming to an end, time to present our main project results!

Online course

All 8 courses on renewable energy and related topics are supported by videos, quizzes and practical exercises. They are now available in 5 languages: English, Dutch, Slovakian, Hungarian and Swedish.

They are presented as an integrated e-learning course via **www.c-test.eu**.

Training Day Manual

Our manual will provide you a step-by-step guide to organise a training day for students on Renewable Energy Sources and their application in practice. The manual is aimed at vocational school teachers who would like to explore outside the class room. The students will gain valuable experience on applying the learned materials into practice together with the employees who can educate them on real life experience in this field. The manual is available for download on our website.

Project results

The main final result of the C-TEST project is a complete online course covering 8 topics: Solar Energy, Wind Energy, Water Energy, Biomass, Geothermal Energy, Waste Management & Recycling, Energy Efficiency, and Environmental Awareness. Free access to the course will be available after registration.
