

Newsletter No 2 – ELEVET

This is the second newsletter of the project. The aim of the newsletter is to keep stakeholders informed about the progress of the project, and this letter covers the period January to March 2012.

New Project Manager

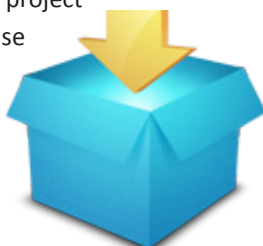

From 1 February 2012, Mr. Andrzej Boron is pointed out as the project manager of ELEVET and substitutes Mr. Stefan Granatowicz. Mr. Boron is Secretary General of SEP. The contact details are SEP Tel: +48 22 55 64 329. E-mail: office.elevet@sep.com.pl

ELEVET uses Dropbox

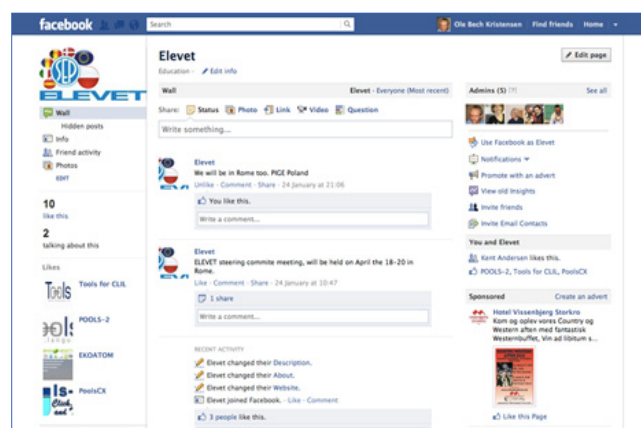

All members of the ELEVET project consortium are invited to use Dropbox as a tool for filing documents produced in the course of the project.

All consortium members have been invited to use Dropbox via email providing username and password.

ELEVET has got a Facebook Profile

Facebook is a website, which is functioning as a social network, and the site is the most visited on the World Wide Web. Facebook has about 250 million unique visits every month. The site has more than 800 million members, and every day 250,000 new members register. The term Facebook refers to books distributed at universities in USA with a picture of each student. Every day about 15 million new pictures are uploaded to Facebook

Kick Off Meeting for New LLP Projects in Brussels

On behalf of the ELEVET consortium, Professor Mr. Jerzy Barglik participated in the kick-off meeting for new LLP projects in Brussels on 19 and 20 January 2012. The framework of running LLP projects was presented by EACEA, and the following key issues were discussed at the meeting:

- Project implementation
- Project management
- Financial management

For further reference, please consult the website of the project: www.elevet.sep.com.pl

The First Concrete Dissemination Activities Done in Romania

The Romanian partner of the project, the Romanian Society of Power Engineers has launched information about the project on the society's own website.

The website informs about the project consortium and the main characteristics of the project in Romanian language. For further reference please consult the website: www.elevet.sier.ro The society has also issued the first national newsletter in January – can also be seen on the project website.

The First Tangible Outcomes of Work Package 2

The aim of the project's work package 2 is to do a legislation and methodology mapping regarding electrician's education in the partner countries of the project. The Romanian partner, SIER, the Italian partner ELIS and the Danish partner, SDE have already prepared these descriptions, which are available on the project website: www.elevet.sep.com.pl

The papers describe the educational system for electricians in the three countries and the methodology used for assessing informal- and unformal education.

Elevet Introduces EQF in Electrician's Education in Denmark

Another outcome of the ELEVET project is, that the Danish partner, SDE has developed a description of the competencies of the electrician's education in EQF, which is the European Qualification Framework. At the current stage the

model is developed in Danish language and will be available in English in the beginning of March. The EQF acts as a translation device to make national qualifications more readable across Europe. The core of the EQF concerns eight reference levels describing what a learner knows, understands and is able to do. Levels of national qualifications are placed at the levels ranging from basic (level 1) to advanced (level 8). This enables a much easier comparison between national qualifications. EQF applies to all types of education from school level to academic, professional and vocational.

Due to the work done in Denmark most learning outcomes of the electrician's education are at level 4 and 5 - and a few ones at level 3. The English version of the framework will be presented at the project website in first half of March 2012.

Contact Details

The contact details of the project secretary are:

Ms. Anna Dzieciol - SEP Foreign Relations

Tel. +48 22 55 64 329
