

Ent-teach platform: 7 units full of opportunities!

All done and ready! ...7 units on entrepreneurship specifically for vocational school teachers. Now available in 5 languages: English, Dutch, Spanish, Polish and Greek. Download, use and enjoy!

The Ent-teach course provides teachers and trainers with practical materials and tools to educate, inspire and motivate students for entrepreneurship. It is designed in a modular way, meaning it can be completed from start to finish but also individual stand-alone units or learning activities can be used.

Ent-teach.eu conference

EfVET and Business Development Friesland (BDF) organised the Final Conference of the Ent-teach project on 7 March in Brussels. Over 50 international guests attended the session on 'VET reinvented: Vocational & Entrepreneurship Teaching' and went home with new inspiration and new contacts: Entrepreneurship+ so to say.

Frank Hiddink of project leader BDF presented the online Ent-teach.eu platform. He explained how all 7 units are supported by videos, learning activities and case studies to be used by the vocational school teacher. The materials are free to download. Visit the Ent-teach platform now and see for yourself: www.ent-teach.eu

Sven Grabbe showed how BDF and Nordwin College organised an Entrepreneurship Day at school together with both young and experienced entrepreneurs as coaches of students. The Ent-teach course has as special section on its website for schools on how to involve entrepreneurs in the class room and organise practical events.
