The project with the official title “Improved Safety for Electricians” started its EU Co-funded period on September 1st. During the first three months the partnership has been busy preparing the first steps of the project outputs and dissemination of the project objectives has started.

Learn more about the project from:

The website: <http://safety4el.net/>

Facebook: <https://www.facebook.com/safety4el>

Twitter: <https://twitter.com/safety4el>

Dissemination during the EBBD conference in Aalborg

Safety4El was invited by the European Business Baccalaureate Diploma (EBBD) conference to present the way the project intends to deliver bilingual teaching and Content and Language Integrated Learning. Kent

Andersen presented the Clilstore system (multidict.net), which is used in the Safety4El Open Education Resource system, so all words in the training texts are linked to online dictionaries covering 118 languages. The slides (in Danish) from the presentation can be downloaded from www.safety4el.net/presentations/Aalborg2016.ppt

Roundtable in Valencia

Two representatives from the Safety4El consortium, Anabel Menica and Kent Andersen, demonstrated the OER (Open Education Resource) prototype, which is being developed in the project with the aim of improving safety for electricians and other employees in the construction industry. The OER is fully free to use, all you and your students need to do is to register at the address: www.safety4el.net/moodle/

All texts in the present version of the OER are © Electrotechnical Certification Scheme: https://www.ecscard.org.uk/Downloads/PoliciesAndDocuments/ECS033-HS_Revision_Guide-July-2015.pdf The texts are used with permission from the SJIB (Scottish Joint Industry Board for Electrical Contracting Industry). In the coming year the partnership will develop similar OER units in Danish, English, Greek, Maltese, and Spanish.

It was a great pleasure for the two presenters that Mariette Harmsen from ROC Midden Nederland has offered to test the OER with Dutch students and also a message through LinkedIn from Sioulis Heracles in Greece, who looks forward to follow the project, showed the importance of the project. This also shows the value of an EfVET roundtable.

Kick-off Meeting in Brussels

The project partnership met in Brussels on November 2nd to start the transnational team-working and work through the content of the first project deliveries.

Johanne Toft-Petersen from the Danish Erasmus+ national office presented project responsibilities and the Erasmus+ administration system.

The teams decided on the upcoming dissemination activities and the first version of the project website and the OER was presented.
