A brief overview

The project aims at ambitious goals: designing and developing a European Platform of Centres of Excellence devoted to innovating in VET sector for excellent social inclusion of individuals belonging to disadvantaged groups.

GIVE focuses in particular on learners with specific characteristics:
- migration background
- disabilities
- low skills and obsolete qualifications
- a drop-out history
- special learning needs
- difficult socio-economic background

We start from the set of methodological and tools that are recognized as excellence at European and international level, in order to contribute to this objective. To reach this goal, the work group will implement and promote:
- entrepreneurial governance models for the development and management of VET centers and agencies
- educational approaches and tools specifically aimed at the social inclusion (in terms of training, international mobility, employment) of people at risk of exclusion.
- models for the design and implementation of effective training-work transition activities.
